Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

in claim 8, line 10, the phrase "switching unit to" (constituting the 8th, 9th and 10th words on that line) has been deleted.

This change has been made solely to correct a duplication of the phrase "switching unit to", the change being understood to constitute a typographical correction only.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the prior art of record teaches that it is well known to provide a hybrid vehicle including an engine with single inverter to control a pair of motors (e.g., Sugiyama et al. EP 0 534 144, note figure 5), through a switching device, one primary motor being a driving motor, the other, secondary, motor not being a driving motor. The prior art fails, however, to teach the operation of the inverter and switching unit operative such that when the secondary motor is required to be driven and the primary motor is driving the vehicle, the engine is started, the primary motor is stopped and the inverter is switched to the secondary motor (e.g., claim 1) or an operation wherein when the primary motor is required for driving while an auxiliary unit is being driven by the secondary motor, the inverter is switched to drive the primary motor after stopping the secondary motor, wherein the previously motor-driven auxiliary unit is then driven by the engine (e.g., claim 4). In the '144 document, it would additionally not be obvious to modify the operation of the hybrid vehicle to meet such a limitation in view of the explicitly taught function of the secondary motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
